Washington, D. C. 20505

16 FEB 1982

MEMORANDUM FOR: Mr. Hugh Montgomery
Director of Intelligence and Research
Department of State

FROM: Robert M. Gates
Deputy Director for Intelligence

SUBJECT: Technology Transfer Through Travel of Soviet,
Chinese, and Other Potential Adversary
Nationals to the US

REFERENCE: D/INR Memorandum to the DDI, Dated
25 January 1982

1. This responds to your referenced memorandum asking for a quick special assessment dealing with the loss of American technology through visits of Communist nationals to the United States. The information and analysis in the attachment specifically addresses each question you raised. More complete information regarding Questions six and seven presumably is available in our Embassies, and we suggest that they be queried. [redacted]

25X1

2. The paper was prepared by the Technology Transfer Assessment Center and drew upon the resources and the contacts of the interagency Committee on Exchanges (COMEX). As I mentioned earlier, within a longer time frame, you might consider requesting an interagency assessment, which could be undertaken under the auspices of the DCI's Technology Transfer Intelligence Committee, or possibly a special national intelligence estimate to more fully address this complex subject. [redacted]
